I hold a valid German work visa. I can join immediately.

TECHNICAL SKILLS

Data Engineer (5+ years of project experience) | **Programming Languages:** Python | SQL | PySpark; **Data Engineering & Big Data:** Apache Spark | Apache Airflow | dbt | Kafka | Hadoop | ETL/ELT Pipelines | Data Warehousing | Data Lakes | Delta Lake | Data Modeling; **Cloud Platforms:** AWS | Azure | Google Cloud Platform (GCP) | Databricks; **Databases:** MongoDB | Oracle | PostgreSQL | Relational Databases; **AI & Machine Learning:** Generative AI | LLM Integration | Vector Databases | Prompt Engineering | ML Pipelines | Feature Engineering; **DevOps & Infrastructure:** Docker | Kubernetes | CI/CD | Git | Terraform; **Monitoring & Data Quality:** Pipeline Optimization | Performance Tuning | Data Validation | Great Expectations | Data Observability; **Collaboration & Methodologies:** Agile/Scrum | Jira

WORK EXPERIENCE

01/2025 – 08/2026

Senior Data & Analytics Engineer

QBS, Remote from Berlin

Project: [Aljasser Holding](#) - Cloud-based data processing platform enabling large-scale data ingestion, transformation, and analytics.

- Designed and built scalable data architecture using Apache Spark and Apache Airflow, reducing end-to-end data processing time from ~4 hours to under 2.5 hours.
- Managed Kubernetes-based deployments and CI/CD pipelines, improving deployment efficiency and reducing system downtime.
- Optimised SQL queries and ETL workflows, increasing processing efficiency and reducing execution time across data pipelines.

Technologies used: Python | Apache Spark | Apache Airflow | SQL | PostgreSQL | dbt | Kubernetes | Docker | GitLab CI/CD | AWS

Project: [Saudi Paper Group](#) - Global data pipeline support services.

- Owned end-to-end data pipeline delivery and orchestration, ensuring reliable processing and 99.9% production availability.
- Optimising data pipelines and deployment processes, reducing average pipeline execution time by ~30% and lowering operational overhead across projects.
- Collaborating with distributed teams to deliver AI-driven data solutions aligned with business needs and technical standards.

Technologies used: Python | Spark | Airflow | AI Solutions | CI/CD | Kubernetes | Docker | AWS | Azure

10/2023 – 12/2024

Senior Data Engineer

Marketlytics, Karachi, Pakistan

Project: [EK Retail](#)- E-commerce AI-driven analytics platform for retail businesses.

- Developed LLM-based analytics solutions using OpenAI and LangChain, reducing manual insight generation effort by ~40% and supporting advanced analytics use cases for retail clients.

- Designed data pipelines with automated validation, improving data quality and reducing processing errors.
- Built scalable Snowflake data warehouse architecture supporting business growth and handling a 3x increase in analytical workloads without performance degradation.

Tech used: Python | SQL | OpenAI | LangChain | Apache Airflow | Snowflake | Data Warehousing | ETL Pipelines | AWS

04/2023 – 10/2023

Senior Data Engineer

360Factors, Karachi, Pakistan

Project: **Centralised Data Lake** - Enterprise data platform consolidating multiple data sources to support analytics.

- Automated data workflows using Airflow, reducing manual effort by 20% and improving operational efficiency.
- Designed and implemented a centralized data lake, improving data accessibility and supporting business growth metrics.
- Ensured data consistency through structured database updates and governance processes.

Tech used: Python | Airflow | MongoDB | Data Lake | ETL Pipelines | SQL

09/2021 – 03/2023

Data Engineer

BluTech Consulting, Karachi, Pakistan

Project: **UBL** - Large-Scale Data Processing System handling millions of records for enterprise analytics. Improved ETL pipelines, saving 60+ engineering hours monthly and enhancing processing efficiency.

Tech used: Python | SQL | ETL Pipelines | Data Processing | Performance Optimization

05/2021 – 09/2021

Data Engineer

NCCPL, Karachi, Pakistan

Project: **Trading Data System** - Developed database functions for a financial trading system managing transaction data.

Tech used: Python | SQL | ETL Pipelines

EDUCATION

08/2017 – 08/2021

Bachelor of Computer Science
NUCES, Karachi, Pakistan

CERTIFICATIONS

Professional Data Engineer Certification, Professional Cloud Database Engineer, Associate Cloud Engineer Certification (Google Cloud, 2024) | Microsoft Fabric Analytics Engineer Associate (Microsoft, 2025) | Azure Data Scientist Associate (Microsoft, 2024) | Neo4J Certified Professional (Neo4J, 2023) | DP 100, DP 300, DP 420, DP 600, DP 700, AI 102, AZ 204, PL 300, SC 200, SC 401, and MS 102 (Microsoft, 2025) | Astronomer Certification for Apache Airflow 3 Fundamentals (Astronomer, 2025)

LANGUAGE SKILLS

English (C2) | Sindi (Mother tongue) | German (B1, currently learning)

HOBBIES

Football | Chess | Cycling
